COVID 19 ANTIBODY THERAPY
EUA Order Sheet

Allergies:

I certify the patient/legal representative was:

1) Informed that Casirivimab 600mg + Imdevimab 600mg is an unapproved drug that is authorized for use under this EUA
2) Instructed on risks, benefits, & alternatives to Casirivimab 600mg + Imdevimab 600mg
   - **After informed decision-making, the patient puts a high value on the uncertain benefits and a low value on uncertain adverse events.**
3) Given the "Fact Sheet for Patients, Parents and Caregivers" prior to administration, AND
4) The patient meets appropriate criteria for administration

   ● ≥12 years of age ● ≥40kgs ● mild to moderate COVID-19 disease

   ● at high risk for progressing to severe COVID-19 and/or hospitalization

   ● is NOT hospitalized, requiring oxygen therapy due to COVID-19, or requiring an increase in baseline oxygen flow rate due to COVID-19 in those on chronic oxygen therapy due to underlying non-COVID-19 related comorbidity

- Date of symptom onset _____**(≤10days)** Date of positive test:_____ - for COVID + Patients only
  - OR
- Post-Exposure to COVID-19 (220.828) at high risk for progression to severe COVID-19 AND who are not fully vaccinated -or- have an immunocompromising condition *EUA for Regeneron Casirivimab/Imdevimab only*

QUALIFYING REASONS FOR ADMINISTRATION (*must choose at least one of the following*)

MEETS HIGH RISK CRITERIA: Patient Selection and Treatment Initiation

- **This section provides essential information on the unapproved product, REGEN-COV (casirivimab and imdevimab) co-formulated product and REGEN-COV (casirivimab and imdevimab) supplied in individual vials to be administered together, for the treatment of mild to moderate COVID-19 in adults and pediatric patients (12 years of age and older weighing at least 40 kg) with positive results of direct SARS-CoV-2 viral testing, and who are at high risk for progression to severe COVID-19, including hospitalization or death [see Limitations of Authorized Use].**
- **The following medical conditions or other factors may place adults and pediatric patients (age 12-17 years and weighing at least 40 kg) at higher risk for progression to severe COVID-19:**
  [ ] Older age (for example, age ≥65 years of age)
  [ ]Obesity or being overweight (for example, BMI >25 kg/m2 , or if age 12-17, have BMI ≥85th percentile for their age and gender based on CDC growth charts, https://www.cdc.gov/growthcharts/clinical_charts.htm)
  [ ]Pregnancy
  [ ] Chronic kidney disease
  [ ]Diabetes
  [ ]Immunosuppressive disease or immunosuppressive treatment
  [ ]Cardiovascular disease (including congenital heart disease) or hypertension
  [ ]Chronic lung diseases (for example, chronic obstructive pulmonary disease, asthma [moderate-to-severe], interstitial lung disease, cystic fibrosis and pulmonary hypertension)
  [ ]Sickle cell disease
  [ ]Neurodevelopmental disorders (for example, cerebral palsy) or other conditions that confer medical complexity (for example, genetic or metabolic syndromes and severe congenital anomalies)
  [ ] Having a medical-related technological dependence (for example, tracheostomy, gastrostomy, or positive pressure ventilation (not related to COVID 19))
  [ ] Other medical conditions or factors (for example, race or ethnicity) may also place individual patients at high risk for progression to severe COVID-19 and authorization of REGEN-COV under the EUA is not limited to the medical conditions or factors listed above.
- **For additional information on medical conditions and factors associated with increased risk for progression to severe COVID-19, see the CDC website: https://www.cdc.gov/coronavirus/2019-cov/need-extra-precautions/people-with-medical-conditions.html.**

COVID 19 ANTIBODY THERAPY
EUA Order Sheet

Allergies:

Healthcare providers should consider the benefit-risk for an individual patient.
REGEN-COV is not authorized for use in patients [see Limitations of Authorized Use]: • who are hospitalized due to COVID-19, OR • who require oxygen therapy due to COVID-19, OR • who require an increase in baseline oxygen flow rate due to COVID-19 in those on chronic oxygen therapy due to underlying non-COVID-19 related comorbidity.

ORDERS

Administer: As soon as possible after positive viral test for SARS-CoV-2 and within 10 days of symptom onset. Infuse using 0.2 micron filter tubing over the prescribed time frame. Monitor patient well being for at least 1 hour. Initiate Emergency orders and call a physician if an adverse reaction occurs. See orders below.

☐ Casirivimab 600mg + Imdevimab 600mg IV infusion - diluted and infused in: check one below
follow infusion with 50ml NS FLUSH

NS 50ml @ 180mls/hr - minimum infusion time 20 minutes
NS 100ml @ 310mls/hr - minimum infusion time 21 minutes
NS 150ml @310mls/hr - minimum infusion time 31 minutes
NS 250ml @310mls/hr - minimum infusion time 50 minutes

Allergic Reaction Emergency Orders:

- **Contact a physician immediately.**
- **Call a Rapid Response or Code Blue as appropriate.**
- **Document Adverse Drug reaction in Vigilanz - pharmacy will send to FDA**
- **The initial management of anaphylaxis includes procurement of a stable airway, place patient in supine or in Trendelenburg's position, administer supplemental oxygen and pressors as needed**

Signs & Symptoms:

· **Cardiovascular – hypoperfusion (decreased circulation)**
- Initiate IV NS to maintain a systolic BP greater than 90 mmHg

· **Respiratory – Acute respiratory distress, stridor, wheezing**
- Epinephrine 1:1000. 0.3 mg IM or SQ if the patient has respiratory distress (inspiratory & expiratory wheezing, stridor and/or laryngeal edema), hypotension and/or ALOC. May repeat x 1 in 10 minutes if necessary
- **Contact a physician immediately.**
- **Call a Rapid Response or Code Blue as appropriate.**
- Albuterol 2.5 mg via nebulizer over 10 minutes. May repeat as needed

If wheezing persists and BP is >90mmHg, consider adding Atrovent 0.5mg to nebulizer

· **CNS – headache, dizziness,seizure**
- Headache - Acetaminophen 1000mg PO
- Dizziness - Dimenhydrinate 50mg PO
- Seizure - Contact Physician immediately - Lorazepam as prescribed by physician

· **GI – Abd. Pain, nausea, emesis,diarrhea**
- Diphenhydramine: 50mg IV or IM

· **Skin – Rash, itching, welts and/or hives**
- Diphenhydramine: 50mg IV or IM for severe itching and/or hives
- Methylprednisolone 125mg IV x1

Allergies:

NURSING PROTOCOL

- Have patient wait to enter the site until pre-scheduled time for treatment
- Ensure patient wearing a mask or face covering before entering the building
- Escort patient directly to room, limit transport and movement of the patient outside of the room
- Keep the door closed while patient in infusion room
- Medical and support personnel entering room need to wear sufficient PPE based on CDC guidelines
- Room should undergo appropriate cleaning and surface disinfection before it is returned to routine use
- Instruct patient to continue to self-isolate and use infection control measures according to CDC guidelines.(e.g., wear mask, isolate, social distance, avoid sharing personal items, clean and disinfect "high touch" surfaces, and frequent handwashing)
